As a part of Alphonsian Community College initiative, a workshop on Crochet Making was organized on 14th March, 2024. The workshop provided hands on experience to learn crocheting for beginners. The Workshop was organized to provide practical skills training and creative outlets for its participants. Crochet making, a versatile craft, was chosen for its accessibility and potential for personal expression. The workshop aimed to introduce participants to the basics of crochet, nurturing their creativity and offering them a new skill for personal and potentially entrepreneurial use.

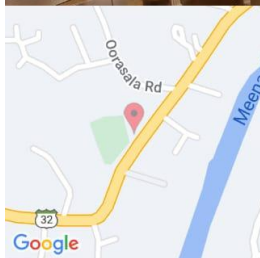

The workshop began with an introduction to crochet techniques, tools, and materials. Participants learned fundamental stitches, such as

chain, single crochet, double crochet, and slip stitch. They practiced these stitches under the guidance of experienced instructors, gradually progressing from simple swatches to more complex patterns. The workshop also provided opportunities for participants to experiment with different yarns, colors, and textures, encouraging creative exploration and individual expression.

The workshop emphasized hands-on learning, allowing participants to practice crochet techniques and build confidence in their abilities. Participants were also encouraged to express their creativity through their crochet projects, whether through color choices, stitch patterns, or design elements. The workshop also fostered a sense of community among participants, who shared tips, ideas, and encouragement with one another, creating a supportive and collaborative learning environment.

The workshop proved to be a rewarding experience for participants, many of whom discovered a newfound passion for crochet making. Participants left the workshop with the skills and confidence to continue exploring crochet on their own, as well as the potential to use their newfound skills for personal enjoyment or entrepreneurial endeavors.

The Workshop on Crochet Making was a successful initiative that provided participants with valuable skills, creative inspiration, and a sense of community. By offering practical, hands-on learning experiences, the workshop contributed to the mission of the community college to empower individuals through education and skill development.
